

Please find the Plainfield Blandford Schedule attached keeping in mind the following:

1. This proposed schedule is non-binding, is intended to provide project milestones, and will be updated monthly as priorities may shift, through the life of the project. All dates are subject to change.
2. Siting approvals are based on an assumed 18 month duration by the DPU following submittal of petitions. This timeline may change depending on DPU review and approval as needed. Comments by the DPU may result in unforeseen scope changes
3. Material durations are based on individual vendor projections provided to Eversource and may change following issuance of final notice to proceed
4. Force Majeure remains in effect - unforeseeable and unavoidable catastrophes that interrupt the expected course of events and prevent participants from fulfilling obligations.
