

**Marion Fairhaven Phase II Kickoff – May 2023**

Eversource is forming a new Group in the Marion-Fairhaven Group Study area to perform a Group Study to determine the scope of required modifications to Eversource's electric power system to provide interconnection service in this area. The Group will consist of applicants currently in the Company's interconnection queue that have been in queue behind the Company's previous Group Study applicants in this area. Potential modifications to the following substations in the Marion-Fairhaven area, along with other potential system modifications, will be reviewed as part of the Group Study:

1. Arsene Substation
2. Crystal Springs Substation
3. Rochester Substation
4. Wing Lane Substation

Pursuant to Section 3.4.1(a) of the Company's Standards for Interconnection of Distributed Generation (the "Interconnection Tariff"), the Company will accept completed Interconnection Applications for this Group Study for a period not to exceed 40 business days from May 1, 2023 (and due by June 28, 2023) ("Group Window"). The Company, in its sole discretion, may close the Group Window earlier. If an application is not deemed complete within the Group Window, it will not be included in the Group, even if the application was received within the Group Window. After the end of the Group Window, Eversource will proceed based on the provisions of Section 3.4.1 of the Interconnection Tariff.
