

**Plainfield Blandford – April 2021**

Eversource held an update call with group customers April 9, 2021 to discuss the study progress and circulated the presentation with the customers. Eversource held a customer update meeting on January 15<sup>th</sup> to review the Steady State analysis results with customers in this group. Eversource has made significant progress in the dynamic study analysis of Transient Over Voltage (TOV) and Risk of Islanding (ROI).

Eversource's intention is to keep all customers regularly informed (at least monthly) on the progress and discuss any significant risks or concerns Eversource encounters during the analysis. Factors that may impact the completion schedule and associated activities include but are not limited to: base case modeling issues; DER stability model issues; solution development for potential adverse system impacts; and/or significant Member Impact changes requiring review.
